Subject: Application for Backend/Full Stack Developer Role

Dear Hiring Manager,

I am writing to express my strong interest in the position of Backend or Full Stack Developer at [Company Name]. As a final-year student pursuing a **BSc Eng. in Computer Science and Engineering at Jamalpur Science and Technology University**, with proven experience in building web applications, automating systems, and leading technical initiatives, I believe I am a strong fit for this role.

Throughout my academic and project work, I have developed a solid foundation in **Python, Django, JavaScript, SQL, and React**. Notably, I built a **Stock Analyzer web app** that sends real-time buy/sell signals via Telegram and email, and a **Library Management System** with user lending logic and categorized book search. I have also contributed to full-stack projects hosted on GitHub, many of which solve real-world workflow problems.

Beyond technical ability, I bring **leadership and community involvement**—serving as both **Class Representative** and **Organizing Secretary** of our university's Programming Club. I've coordinated seminars, workshops, and tech events for over 100 participants, and led teams during university-wide events and social movements.

I am passionate about backend systems, automation, and AI-driven development. I am eager to bring my problem-solving mindset, collaborative nature, and eagerness to grow into your team. I would welcome the opportunity to discuss how I can contribute to [Company Name]'s success.

Thank you for considering my application. I have attached my resume for your review. I would be delighted to speak further at your convenience.

Sincerely,

Md. Fizur Rahman Fahim
